SUMMARY

Associate Product Manager with 1+ years of experience in B2B SaaS, specializing in sales enablement and content-driven product workflows. Delivered measurable outcomes including 20% faster decision-making, 15% higher user engagement, and 40% reduction in manual reporting effort through data-driven prioritization and agile execution. Experienced in defining feature sets, writing user stories with acceptance criteria, conducting competitor analysis, and leading cross-functional delivery across Engineering, Design, Sales, and Marketing. Proficient in SQL, Python, and analytics tools (Looker, Power BI, Mixpanel) with a strong foundation in user behavior tracking, sprint management, and product lifecycle ownership.

TECHNICAL SKILLS

- Languages:** Python (Streamlit, Pandas, Matplotlib, Scikit-learn), SQL, JavaScript
- Product Analytics:** Mixpanel, Amplitude, FullStory, Google Looker, Power BI, Tableau
- Product Management:** JIRA, Trello, Sprint Planning, Backlog Grooming, User Story Mapping, A/B Testing
- UX & Research:** Figma (Wireframing, Prototyping), User Interviews, Competitive Benchmarking
- Developer Tools:** Git, GitHub, CI/CD, MySQL, Snowflake
- Sales/Marketing Tech:** CRM Platforms, Content Management Systems, Email Automation Workflows

EXPERIENCE

- Associate Product Manager**

SurveySparrow – SparrowGenie (AI-powered Sales & Proposal Platform)

 - Owned end-to-end product delivery for the Messages and Tasks modules, reducing team dependency on Slack and email by consolidating proposal collaboration into a single workspace – cutting context-switching for sales and presales teams.
 - Mapped RFP and proposal workflows across BDRs, AEs, and Proposal Managers, identifying 5 critical friction points that informed feature prioritization and eliminated redundant document handoff steps.
 - Authored detailed PRDs with acceptance criteria and broke features into scoped user stories, enabling engineering to ship the MVP notification system within 2 sprint cycles with zero scope creep.
 - Designed a role-based notification engine with batching, priority tiers, and mute controls – reducing alert volume by an estimated 60% while preserving visibility on deal-critical updates.
 - Conducted 10+ discovery interviews with sales and presales stakeholders, surfacing recurring coordination patterns that directly shaped the task assignment and @mention features.
 - Collaborated with Design to prototype interaction flows in Figma, iterating through 3 rounds of stakeholder feedback to finalize flows that scored 4.5/5 on internal usability reviews.
 - Led sprint planning sessions and backlog grooming, maintaining a prioritized backlog of 30+ user stories and ensuring on-time delivery across 4 consecutive sprints.

Jun 2025 – Present

Kochi, Kerala
- Business Analyst**

Gryphon Academy Pvt. Ltd.

 - Built and maintained real-time dashboards in Looker Studio and Power BI tracking 12 key product KPIs, directly contributing to a 15% increase in customer retention through faster anomaly detection.
 - Ran A/B tests on onboarding flows and content presentation formats, driving a 15% lift in user engagement and informing the product roadmap with statistically validated feature decisions.
 - Automated 6 data pipelines and reporting workflows using SQL and Google Apps Script, reducing manual reporting effort by 40% and accelerating weekly insights delivery from 3 days to same-day.
 - Performed competitive benchmarking across 8 rival platforms, identifying 3 feature gaps that were prioritized into the roadmap and contributed to a stronger market positioning narrative.
 - Collaborated cross-functionally with Engineering, UX, Content, and Marketing teams to translate business requirements into user stories, ensuring feature specs were implementation-ready before sprint kickoff.

Jul 2024 – May 2025

Pune, India

- Streamlined customer feedback collection through automated survey triggers, improving response rates by 40% and enabling data-backed prioritization of the next quarter’s feature roadmap.
- Contributed to product roadmap planning by synthesizing user feedback, usage analytics, and market trends into a scored prioritization framework adopted by the product leadership team.

PROJECTS

SparrowGenie Workspace (Messages, Tasks, and Notifications)

Designed and shipped a unified collaboration workspace for B2B sales teams. Mapped end-to-end proposal workflows, defined user journeys, and authored PRDs for 3 core modules. Built a notification batching system that reduced alert noise while maintaining deal-critical visibility – directly applicable to content sharing and sales enablement workflows.

Personal Finance Tracker (Streamlit Web App)

Shipped a real-time finance dashboard using Streamlit and Google Sheets that auto-categorizes transactions and tracks savings goals. Built a psychology-driven spending model that identifies impulsive behavior and estimates savings potential – demonstrating end-to-end product thinking from problem discovery to working software.

Digitized Contract and Invoice Management System

Replaced manual contract tracking with a structured digital system using Google Sheets, JavaScript, and MySQL. Improved data-driven decision-making for contract renewals and reduced invoice processing errors, resulting in better compliance and faster billing cycles.

Customized LMS for Gryphon Academy

Led backend architecture design (ER Diagrams, Database Schemas, MySQL) and built Figma wireframes for a scalable Learning Management System. Improved stakeholder alignment by translating technical architecture into intuitive prototypes that both engineering and non-technical teams could validate.

Real-Time Feedback System with Live Dashboards

Developed a real-time user feedback loop using Google Sheets, Apps Script, and Looker. Automated data processing and visualization enabled same-day insights into user sentiment, improving response time for product decisions by over 50%.

EDUCATION

Master’s in Business Administration, Systems and Human Resource

Bharathidasan School of Management

Class of 2024

Trichy, Tamil Nadu

Bachelor of Science, Psychology

The American College

Class of 2022

Madurai, Tamil Nadu

CERTIFICATIONS

Master Product Management – FutureVersity School

Data Science Training Program – Geeks for Geeks (ongoing)

Master in Business Analytics and Digital Marketing – Guvi

Predictive Analytics – NPTEL, Prof. Dinesh Kumar, IIM Bangalore

Supply Chain Management – NPTEL, Dr. P. Chitramani

HONORS AND AWARDS

- Awarded “Pat on the Back,” “Rising Star,” and “Ace Employee” certificates for consistent high-impact delivery and cross-team contributions.
- Won 1st place at the KIMO Tech Competition, recognized for innovative product solution design.
- Received Best Paper Award at the AI International Conference (Bishop Heber College, Trichy) for excellence in applied research.
