SUMMARY

Associate Product Manager with 2+ years of B2B SaaS experience, specializing in sales enablement, RFP automation, and content-driven product workflows. Took full ownership of a product module from 0-to-1, working directly with the CEO and BU Head to define vision, remove blockers, and drive significant product momentum in early-stage building. Delivered measurable outcomes including 20% faster decision-making, 15% higher user engagement, and 40% reduction in manual reporting effort through data-driven prioritization and agile execution. Experienced in defining feature sets, writing user stories with acceptance criteria, conducting competitor analysis, and leading cross-functional delivery across Engineering, Design, Sales, and Marketing. Proficient in SQL, Python, and analytics tools (Looker, Power BI, Mixpanel) with a strong foundation in user behavior tracking, sprint management, and end-to-end product lifecycle ownership.

TECHNICAL SKILLS

- Languages:** Python (Streamlit, Pandas, Matplotlib, Scikit-learn), SQL, JavaScript
- Product Analytics:** Mixpanel, Amplitude, FullStory, Grafana, Google Looker, Power BI, Tableau
- Product Management:** JIRA, Trello, Sprint Planning, Backlog Grooming, User Story Mapping, A/B Testing
- UX & Research:** Figma, Balsamiq (Wireframing, Prototyping), User Interviews, Competitive Benchmarking
- Developer Tools:** Git, GitHub, CI/CD, MySQL, Snowflake
- Sales/Marketing Tech:** CRM Platforms, Content Management Systems, Email Automation Workflows

EXPERIENCE

Associate Product Manager <i>SurveySparrow – SparrowGenie (AI-powered RFP Automation & Sales Platform)</i>	Jun 2025 – Present Chennai, India
- Took full ownership of the RFP Automation module from 0-to-1, defining product vision and shipping 3 core feature sets in under 4 months – establishing the foundational workflow that became the platform’s primary value driver. - Partnered directly with the CEO and BU Head to set quarterly product priorities, unblock 8+ cross-functional dependencies, and compress delivery timelines by 30%, accelerating the module from concept to live beta within one quarter. - Managed end-to-end development of the collaboration workspace, consolidating proposal workflows into a single platform and reducing team reliance on 4 separate tools (Slack, Email, Drive, Sheets) – cutting average context-switching time by an estimated 45%. - Mapped 12 complete user journeys across BDRs, AEs, and Proposal Managers, identifying 5 critical friction points that eliminated 3 redundant handoff steps and reduced average proposal turnaround time by 25%. - Authored 8 detailed PRDs with measurable acceptance criteria and decomposed features into 30+ scoped user stories, enabling engineering to ship the MVP within 2 sprint cycles with zero scope creep and 0 critical defects at launch. - Designed a role-based notification engine with batching, priority tiers, and mute controls – reducing alert volume by 60% while preserving 100% visibility on deal-critical updates across 3 user roles. - Conducted 10+ discovery interviews with sales and presales stakeholders, uncovering 7 recurring coordination patterns that directly shaped feature prioritization and contributed to a 35% reduction in repetitive follow-up tasks. - Collaborated with Design to prototype 15+ interaction flows in Figma and Balsamiq, iterating through 3 feedback rounds to finalize screens that scored 4.5/5 on internal usability reviews and achieved first-sprint sign-off from engineering. - Led sprint planning and backlog grooming for 4 consecutive sprints, proactively resolving 6 product-side blockers and maintaining a 95% on-time delivery rate across all committed user stories.	
Business Analyst <i>Gryphon Academy Pvt. Ltd.</i>	Jul 2024 – May 2025 Pune, India

- Built and maintained real-time dashboards in Looker Studio and Power BI tracking 12 key product KPIs, directly contributing to a 15% increase in customer retention through faster anomaly detection.
- Ran A/B tests on onboarding flows and content presentation formats, driving a 15% lift in user engagement and informing the product roadmap with statistically validated feature decisions.
- Automated 6 data pipelines and reporting workflows using SQL and Google Apps Script, reducing manual reporting effort by 40% and accelerating weekly insights delivery from 3 days to same-day.
- Performed competitive benchmarking across 8 rival platforms, identifying 3 feature gaps that were prioritized into the roadmap and contributed to a stronger market positioning narrative.
- Collaborated cross-functionally with Engineering, UX, Content, and Marketing teams to translate business requirements into user stories, ensuring feature specs were implementation-ready before sprint kickoff.
- Streamlined customer feedback collection through automated survey triggers, improving response rates by 40% and enabling data-backed prioritization of the next quarter's feature roadmap.
- Contributed to product roadmap planning by synthesizing user feedback, usage analytics, and market trends into a scored prioritization framework adopted by the product leadership team.

PROJECTS

Personal Finance Tracker (Streamlit Web App)

Shipped a real-time finance dashboard using Streamlit and Google Sheets that auto-categorizes 15+ spending categories and tracks 5 savings goals simultaneously. Built a psychology-driven spending model that identified impulsive patterns in 200+ historical transactions, estimating 18% savings potential per month.

Digitized Contract and Invoice Management System

Replaced manual contract tracking with a structured digital system using Google Sheets, JavaScript, and MySQL. Digitized 100+ contracts, reduced invoice processing errors by 35%, and cut average billing cycle time from 10 days to 4 days – improving compliance and enabling data-driven renewal decisions.

Customized LMS for Gryphon Academy

Led backend architecture design (ER Diagrams, 8 Database Schemas, MySQL) and built 20+ Figma wireframes for a scalable LMS serving 500+ learners. Reduced stakeholder review cycles from 3 rounds to 1 by translating technical architecture into intuitive prototypes validated by both engineering and non-technical teams.

Real-Time Feedback System with Live Dashboards

Developed a real-time user feedback loop using Google Sheets, Apps Script, and Looker that processed 1,000+ responses monthly. Automated data processing cut manual analysis by 70% and enabled same-day insights into user sentiment, improving product decision response time by over 50%.

EDUCATION

Master's in Business Administration, Systems and Human Resource

Bharathidasan School of Management

Class of 2024

Trichy, Tamil Nadu

Bachelor of Science, Psychology

The American College

Class of 2022

Madurai, Tamil Nadu

CERTIFICATIONS

Master Product Management – FutureVersity School

Data Science Training Program – Geeks for Geeks (ongoing)

Master in Business Analytics and Digital Marketing – Guvi

Predictive Analytics – NPTEL, Prof. Dinesh Kumar, IIM Bangalore

Supply Chain Management – NPTEL, Dr. P. Chitramani

HONORS AND AWARDS

Awarded “Pat on the Back,” “Rising Star,” and “Ace Employee” certificates for consistent high-impact delivery and cross-team contributions.

Won 1st place at the KIMO Tech Competition, recognized for innovative product solution design.

Received Best Paper Award at the AI International Conference (Bishop Heber College, Trichy) for excellence in applied research.
